

## Guidelines and Expectations for Departmental Orientation Courses Satisfying the College of Arts and Sciences DAS 101 (1 credit hour) Requirement

**Context:** *The Kansas Board of Regents and the Next-Gen Strategic Plan emphasize the importance of student success. KBOR is looking at specific metrics related to Student Success annually and expects that the University will implement the full set of recommendations of the K-State Student Success Playbook. It will be imperative that the College of Arts & Sciences act strategically and begin to consider how to scale existing successful practices to work towards achieving these goals while identifying new business procedures or methods to implement as needed. One area the College of Arts and Sciences aims to intentionally address is first-year retention. As part of our approach to increasing first-year retention, the College developed an Orientation course (DAS 101) that will emphasize student success, help instill a sense of belonging among learners and prepare students for college coursework.*

*Departments seeking to maintain and run their own departmental orientation course, to satisfy the college orientation requirement, are asked to include the following SLOs and the Success Inventories. Further, departments are expected to adhere to other guidelines set here related to class instructional mode and modality, and other notables that align with student success initiatives of the institution and the College of Arts and Sciences.*

**A. Course Description and Student Learning Objectives:** Departmental Orientation courses aimed at satisfying the College of Arts and Sciences DAS 101 orientation requirement will integrate the following course description and student learning objectives into their syllabi. Departments may add additional information to the course description that pertains to the department, additional disciplinary content, and additional SLOs.

Course Description & Student Learning Objectives: Welcome to K-State's College of Arts & Sciences and the Department of **INSERT!** In this course, you will explore what it means to be human, understand your world, and gain a global perspective while laying a foundation for success in your collegiate studies. **INSERT INFO RE DISCIPLINARY COURSE, ADD IN SLOs FOR DISCIPLINARY CONTENT BELOW.** Upon successful completion of this one-credit orientation you will be able to:

1. Describe our rich history as the nation's first operational land-grant and the role the arts & sciences play therein;
2. Identify campus resources and connect in meaningful ways to the campus community broadly, your academic program, and your peers in your classroom community;
3. Develop skills and strategies to support your success, including managing time effectively, developing effective study habits, practicing research skills and critical thinking, communicating effectively and respectfully, and working collaboratively;
4. Examine interdisciplinary ways of knowing and compare disciplinary approaches in the arts, humanities, social sciences, natural and quantitative sciences; and

5. Develop your rapport with your academic advisor and build a personalized long-range academic plan, including a selection of experiences (applied learning, education abroad, minors/majors/certificates, student organizations, research, etc.) you want to embed into your college experience to enhance your time here and prepare you for your long-term career goals.

**B. Adoption of 40% Content and Success Inventories and Accompanying Outcome Measures:**

Departmental Orientation courses aimed at satisfying the College of Arts and Sciences DAS 101 orientation requirement will adopt 40% of the content and accompanying outcome mastery measures from the standard DAS 101 course. This 40% adoption of content will be integrated via Success Inventories. The Success Inventories are four assignments (each with multiple components) that are tied to class readings and content and build on the student learning objectives. The Success Inventories together culminate into a project that helps students develop important skills related to self-discovery, finding institutional resources, future planning, and fosters a sense of belonging. Each Success Inventory Assignment is paired with a corresponding rubric and outcome measure in Canvas. The rubrics and outcome measures are an important part of program assessment. *Note: Detailed assignment descriptions of the Success Inventories, rubrics, and outcomes may be obtained from Emily Mann, Orientation Coordinator. There may be some modification by departments of the Success Inventories to align with the course content and disciplinary expectations.*

Success Inventories (40%): Over the course of the semester, you will complete several Success Inventories. Each of these will be tied to a set of readings and activities completed in class and building on the course learning outcomes. Work on these will be conducted in class as well as some work outside of class, particularly with regard to the academic advising appointment. The themes of the success inventories are:

- **Becoming a Learner:** Inventory of skills and mindset, identifying areas of strength and areas to grow as well as strategies for exploring more broadly interdisciplinary educational and co-curricular opportunities that will contribute to growth as individual, citizen and member of the campus community, and map out ways to connect with opportunities across campus to build a rich network of support.
- **Research and Create:** Understanding and identifying resources, developing your voice as author and researcher, and critically analyzing a range of sources and perspectives. Evaluate your own process, your approach, your mindset and grit.
- **Plan and Thrive:** Academic advising appointment, developing a long-range plan that includes goals related to engagement and applied learning opportunities that correlate to short-term and long-term goals, practicing strategies related to goal-setting.
- **Know Thyself:** Culminating activity evaluating what skills and competencies you've developed over the course of the semester, what you've learned about yourself and about arts & sciences, what you'd like to learn next, and your philosophy of learning and interdisciplinarity that you'll continue to develop over the course of your time in the College.

**C. Grading Basis:** Departmental Orientation courses aimed at satisfying the College of Arts and Sciences DAS 101 orientation requirement will use a “graded” grading basis.

**D. Instructional Mode and Course Modality:** Departmental Orientation courses aimed at satisfying the College of Arts and Sciences DAS 101 orientation requirement should be delivered as an in-person: physical presence modality or in-person driver hybrid modality. In-person courses, in which the instructor and students are all simultaneously present in the classroom space, are considered the traditional mode of teaching at Kansas State University. Online departmental orientation courses should only be utilized to serve students in online degree programs. The course component is recommended to be REC- Recitation. A recitation is an interactive meeting that combines formal presentation, review, and interaction between the students and faculty/instructor. A seminar (SEM) course component will also be accepted. The course meeting dates should correlate with the regular academic session (16 weeks). Finally, courses should be assigned as 1 unit, or 1 credit hour, and the weekly course meeting length should correlate with this unit or credit hour assignment.

**E. Course Capacity:** Departmental Orientation courses aimed at satisfying the College of Arts and Sciences DAS 101 orientation requirement should have a course capacity of 25-30 students. Courses may employ a higher course capacity (no greater than 60) IF sufficient learning support and structure is planned and implemented. The Dean’s Office will support learning assistants if units desire. Please contact Dr. Christie Launius (launius@ksu.edu) with questions or to request learning assistants.

**F. Instructor Expectations:** It is preferable to appoint instructors with experience to teach departmental orientation courses. Further, it is expected that departmental orientation instructors will participate in shared annual meetings about pedagogy in the orientation course.

**G. Other:** Departments offering their own orientation course will be expected to fund that internally as they do the rest of their instruction.

*\*Departments wishing to deviate from any of these expectations may submit a request to do so, providing explanation in the Departmental Orientation Proposal Form.*
