

COLLEGE OF ARTS AND SCIENCES
COURSE AND CURRICULUM CHANGES

Amended and approved at the College faculty meeting

February 4, 2010
Kedzie 106

4:00 p.m.

Undergraduate/Graduate
Non-Expedited

Contact Person: Joe Aistrup
532-6900
e-mail: jaistrup@ksu.edu

Units outside the college, which may be directly
impacted by these changes are:

Please provide the sponsors of a proposal change with any information regarding fiscal or programmatic impact on your department, program or students

NON-EXPEDITED COURSE PROPOSALS

Courses Numbered 000 – 599

Dean of Arts and Sciences

ADD: DAS 455 – History and Theories of Nonviolence: A Survey of Philosophies and Strategies. (3) II, S. Students will learn about nonviolence ideas and strategies and how historical and cultural contexts influence these. Pr.: DAS 355.

RATIONALE: Supports Nonviolence Studies program with instruction and research on theories and strategies in context.

IMPACT: None

EFFECTIVE DATE: Summer 2010

Mathematics

ADD: MATH 101 – Studio College Algebra. (3) I, II, S. Fundamental concepts of algebra; algebraic equations and inequalities; functions and graphs; zeros of polynomial functions; exponential and logarithmic functions; systems of equations and inequalities. Class includes a weekly studio section to explore applications of the material. (~~Targets students preparing for STAT 325 or MATH 205~~). This class and Math 100, College Algebra, substitute for each other in all requirements at K-State. Credit is not allowed for both classes. Pr.: B or better in MATH 010; or two years of high school algebra and a College Algebra (Prob \geq C) of 60 or more on the ACT assessment; or an appropriate score on the K-State mathematics placement exam.

RATIONALE: We have been offering two flavors of College Algebra for several years to meet the needs of the diverse population served by the course. With iSIS it has proven challenging for students and advisors to identify which sections are of each flavor and we have been asked to provide different course numbers to simplify this process. These two courses still cover the same core material and should not be treated as separate courses for the purposes of degree requirements or prerequisites. It is an essential part of this proposal that MATH 100 and MATH 101 substitute for each other in all requirements across the university.

EFFECTIVE DATE: ~~Fall 2010~~–Spring 2011

Geography

ADD: GEOG 445 – Biogeography. (3) II. Covers: 1) the spatial and temporal patterns of the distribution of living organisms on Earth (including plants, animals, and microbes), and 2) the biological and physical processes responsible for these patterns. Biogeography has crucial insights to offer regarding conservation of rare species, global changes such as climate change, and human domination of the Earth surface. Pr.: one course in geography, life science, or physical science.

RATIONALE: Biogeography, the study of the spatial distribution of life on Earth, is one of the core subfields of geography. It is a highly interdisciplinary subject that integrates aspects of biology, geology, and geography. It is extremely useful for understanding current conservation biology and global change challenges from a scientific perspective. Yet, Kansas State University has never offered a Biogeography course. I am excited to offer this mid-level course at KSU to serve a variety of undergraduate students. Since Biogeography is one of my research specialties, I have received several inquiries from students about offering this course. It is very similar to courses taught at other universities, has a well-respected textbook, and will augment the curriculum across the University.

IMPACT: I am not sure if this is an impact, but this course will likely fill an elective requirement for undergraduate majors in Biology.

EFFECTIVE DATE: Spring 2011

Courses Numbered 600-999

Geography

ADD: GEOG 745 – Topics in Biogeography. (3) I. Examination of selected biogeography topics. Note: repeatable once with change in topic. Pr.: GEOG 445 or instructor permission.

RATIONALE: Biogeography is one of the core subfields of Geography. It is a rich topic both historically and in terms of cutting-edge science. I will be offering a new 400-level Biogeography course at Kansas State University. This 700-level course offering allows me to explore some of these topics in greater detail for upper-level undergraduate and graduate students. I have attached a sample syllabus for a topic called Ecoregions. Other topics might include courses about Species Distribution Models and Paleoenvironmental Change.

IMPACT: I do not foresee any impacts on other units.

EFFECTIVE DATE: Fall 2010

Psychology

ADD: PSYCH 855 – Seminar in Applied Cognitive Science. (3) I, II. Multidisciplinary survey and discussion of empirical research and theoretical approaches to cognitive science topics. Pr.: Consent of instructor.

RATIONALE: This is a multidisciplinary graduate survey seminar taught by various Cognitive Science faculty and involving guest presentations. Its purpose is to promote commonality among student's backgrounds and also to allow students to learn about one another's research interests.

IMPACT: Does not impact another unit.

EFFECTIVE DATE: Fall 2010

CURRICULUM CHANGES

Undergraduate (Non-expedited)

Mathematics
